ABSTRACT

Enrollment information collected by the Commissioner of Higher Education from each college and university in Montana for fall 1979 is summarized in this report. It is noted that enrollments in degree credit institutions for 1979 increased by 122 from the previous year. Total fall 1979 enrollment is 30,898 students with 83 percent of the students attending campuses of the Montana University System. Ten percent attend private colleges and 7 percent enrolled in community colleges. Montana State University accounts for the largest percentage of students in the Montana University system. Tabulated information is provided on comparative institutional enrollments: distribution within the state system by class, level, and by sex: transfer students: first-time students: full- and part-time students: minority student enrollment: and student credit hour load. Appended is the Consolidated Enrollment Report for Montana University System, private colleges, and community colleges with detailed statistics' for the fall 1979. (SF)

ENROLLMENT IN HIGHER EDUCATION INSTITUTIONS IN THE STATE OF MONTANA, FALL 1979*

Enrollment information is collected by the Commissioner of Higher Education from each college and university within the State of Montana. This report summarizes those data for Fall 1979 and makes some comparisons with the previous year or years.

Enrollment of students in degree credit programs in higher education institutions in the State of Montana in the fall semester or quarter of 1979 increased by 122 students or 0.4% from the previous fall. If data from the Montana Institute of the Bible which were not included in the data for Fall 1978 were excluded from Fall 1979, there would have been an overall decrease of 92 students or -0.3%. Table I shows these data.

Table I. Total enrollment in higher education institutions in the State of Montana, Fall 1978 and 1979

	Fall enrollment		Change	
	1978	1979	Numerical	Percent
Montana University System	24,989[a]	25,514	+ 525	+ 2.1

Community colleges	2,651[c]	2,202[c]	- 449	- 16.9
Total	30,776	30,898	+ 122	+ 0.4

[a]Previously reported figure of 25,100 has been adjusted to reflect transfer of enrollments from Malmstrom AFB to continuing education.

[b]Enrollments at Montana Institute of the Bible excluded.

[c]These figures exclude students enrolled in non-credit, community service courses.

[d]Enrollments at Montana Institute of the Bible included.

83% of the enrolled students attend campuses of the Montana University System, a slight increase over the previous year,

* Prepared by Paul C. Dunham, Director of Planning and Research

10% attend private colleges and 7% enroll in community colleges, a decrease from the previous year.

Montana State University accounts for the largest percentage of students in the Montana University System (39.6%) and in the state (32.7%), a slight increase over the previous year.

Changes in enrollments from the previous year are not similar for all institutions in the state nor for the various sectors of higher education. Table 2 shows the institutional changes between the two years.

[a]406 students were also enrolled in community service, non-credit courses

[b]55 students were also enrolled in community service, non-credit courses.

[c]Montana Institute of the Bible has not been included previously.

[d]Figure of 1,195 previously reported has been adjusted to reflect movement of enrollments for Malmstrom AFB into continuing education enrollment, not reported here.

[e]There are 5 Indian community colleges organized in the state currently. Data from these institutions is not available.

From Table 2 one can observe that headcount enrollment increased at all campuses of the Montana University System except Western Montana College and that headcount enrollment decreased at all private colleges and two of three community colleges from Fall 1978 to Fall 1979. The decrease at Flathead Valley Community College may reflect a change in enrollment reporting methods.

Distribution of total enrollment in the Montana University System by Campus

The proportion of the total enrollment of the Montana University System attributed to any campus fluctuates from year to year somewhat. Table 3 portrays these changes for several years.

Table 3. Percent distribution of enrollments within the Montana University System, by campus, 1974-75 -- 1979-80

Campus	1974-75	1975-76	1976-77	1977-78	1978-79	1979-80
UM	38.1	36.7	34.9	33.3	33.3	32.8
MSU	37.4	37.3	38.6	39.4	39.5	39.6
MCMST	3.7	4.2	4.4	4.8	5.2	5.4
WMC	3.4	3.2	3.4	3.4	3.4	3.4
EMC	13.0	13.9	13.7	13.9	13.7	14.1
NMC	4.4	4.7	5.0	5.3	4.8	4.7

From 1974-75 to 1979-80 the proportion of the total enrollment attributable to the University of Montana has declined while Montana State University, Montana Tech, Eastern Montana College and Northern Montana College have increased slightly. Western Montana College's proportion is the same for both years.

During the same time period the Montana University System proportion of total state enrollment has increased from 81.2% to 82.6%, the private colleges have increased from 9.9% to 10.3% while the community colleges have declined from 8.8% to 7.1%.

Distribution by class

Changes in the distribution of enrollments by class may be important to future planning by institutions of higher education. Table 4 provides a comparative summary for the two most recent years.

*During the past year some of the formats for reporting enrollments to the Office of the Commissioner of Higher Education have been changed; thus, comparison of some categories in this table are impossible between the two years.

**Reclassification caused some students who were previously classified as graduate students to be categorized as post-baccalaureate students.

***See footnote a, Table I.

****1979 reflects inclusion of enrollment data from Montana Institute of the Bible, while 1978 does not.

Statewide, a small drop in numbers of freshmen, sophomores and seniors from the previous year is apparent while only juniors show a slight increase.

Distribution of enrollment by level

89% of the students enrolled in higher education institutions in Montana are classified as undergraduates, 5.6% as graduate students and 5.3% as post-baccalaureate and miscellaneous. Table 5 portrays these data.

Table 5. Distribution of enrollments by level of student, Fall 1979

Within the Montana University System 87% of the students are undergraduates, 6.7% graduate students and 6.2% are post-baccalaureate and miscellaneous.

Distribution of enrollment by sex

Males account for 50.7% of the students enrolled in higher educational institutions this fall in Montana, while females account for 49.3%. Last fall females were 48.7% of the total number of students. Table 6 shows these data by institution for Fall 1978 and Fall 1979.

A larger percentage of the students in the private and community colleges are female than is the case in the Montana University System.

Transfer Students

Transfer students constitute a significant segment of the enrollment in institutions of higher education in Montana as they do nationally. In 1979, these students accounted for 9.4% of the total enrollment. Of the total number of transfer students, 42.5% are from Montana institutions, 55.7% from other states and 1.8% from foreign institutions. Table 7 shows the enrollment of transfer students in Montana for the years 1978 and 1979.

The number of transfer students declined from 1978 to 1979 by 206 students. From 1977 to 1978 there was a decline of 156 transfer students. Most of the decline in transfer students occurred in the Montana University System and the community colleges from 1978 to 1979. It is possible that these declines may be reflecting enrollment declines in other states.

Transfers among Montana institutions only are interesting. Table 8 shows the net effect of these transfers within the state.

In both 1978 and 1979 the Montana University System received more transfer students from other Montana institutions than it lost to those institutions, while the private colleges and community colleges received fewer transfer students from other Montana institutions than they donated to other Montana institutions.

In-state versus out-of-state enrollment

Out-of-state enrollment constitutes 18.5% of the total enrollment of institutions of higher education in Montana. Table 9 shows these data by institution for 1978 and 1979.

In-state enrollment varies from 35% of the total enrollment at the Montana Institute of the Bible to 99% at Miles Community College while in the Montana University System in-state enrollment varies from 69% at the University of Montana to 96% at Eastern Montana College and Northern Montana College. In the Montana University System as a whole and in the total enrollment for all institutions in the state, the percent of non-resident students

declined somewhat from the previous year.

First-time students

Students entering higher educational institutions for the first time are separately reported. From Fall 1978 to Fall 1978 there was an overall decrease of 46 first-time freshmen. Both out-of-state and in-state first-time freshmen declined very slightly. Table 10 shows these data by institution.

Within the Montana University System, all institutions show some increase in first-time freshmen, except for Montana State University in which there was a slight decrease. Three campuses in the system show decreases in out-of-state first-time freshmen while three show increases from the previous year.

Part-time versus full-time enrollment

Part-time enrollment, exclusive of enrollment in Continuing Education programs, continues to be a significant portion of total enrollments. In 1979, part-time enrollments account for 21% of the total enrollments of all institutions of higher education in Montana, a decrease of 1.5% from the prior year. Table 11 shows these data.

Within the Montana University System, while the part-time enrollment constitutes 17.2% of the total enrollment as it did the previous year, there were some institutional changes. Four institutions in the system show some decrease in the percent of part-time enrollments from the previous fall. At Northern Montana College some of the change is attributable to the transfer of the enrollments at Malmstrom Air Force Base to Continuing Education.

Full-time equivalent students

For some purposes, especially budgeting, it is desirable to convert part-time students to full-time equivalents. To do so, a formula which equates 15 undergraduate student credit hours (or 12 graduate student credit hours) to one full-time equivalent student is used. Table 12 portrays these data for higher education institutions in Montana for Fall 1978 and 1979.

Full-time equivalent students for the fall semester or quarter is a useful statistic for some purposes, but for budgeting actions, a different statistic called the fiscal-year full-time equivalent student (FY FTE) is utilized. This statistic reflects enrollment for an entire year, including summer sessions. Table 13 shows an historical summary of fiscal-year full-time equivalent students within the Montana University System.

Table 13. Fiscal-year full-time equivalent enrollment
Montana University System
1973-74 - 1978-79

Year	UM	MSU	TECH	WMC	EMC	NMC	SYSTEM
1974-75	8,575	8,585	714	742	3,048	1,065	22,729
1975-76	8,496	8,965	894	735	3,306	1,225	23,621

1978-79	7,868	9,555	1,139	643	2,910	1,149	23,264

The total number of fiscal-year full-time equivalent students in the Montana University System has increased from 22,729 in 1974-75 to 23,264 in 1978-79. The latter figure is a slight decrease from 1977-78.

Distribution of student credit hour load

For purposes of converting headcount enrollment to full-time equivalent students, a factor of 15 student credit hours at the undergraduate level and 12 at the graduate level is used as the norm for a full-time student. Table 14 shows the distribution of student credit hour load for graduate and undergraduate students within the Montana University System, exclusive of postbaccalaureate and miscellaneous categories of students.

From Table 14 it is apparent that the average load varies slightly from

campus to campus for undergraduate students producing a system-wide average of 14.3 student credit hours per undergraduate student. At the graduate level the average varies more widely from campus to campus, giving a system-wide average of 9.3 student credit hours per graduate student.

Enrollment of minority students

Enrollment of minority students is reported to the United States Office of Education every two years by all institutions of higher education in the state. Table 14 portrays these data for Fall 1976 and Fall 1978.

Whether or not the changes portrayed by the data are completely accurate is not known. It is possible that the change reflects a refinement in the method of collecting and reporting the data.

Consolidated enrollment reports

A consolidation of enrollment data from the 13 institutions of higher education in Montana is attached which provides greater detail. Complete enrollment reports are on file in the Office of the Commissioner of Higher Education.

Consolidated Enrollment Report

The reports which are contained in this appendix present enrollment data for all institutions of higher education in Montana.

Definitions applicable to these reports are:

Total enrollment: The number of individuals enrolled during the academic period.

Part-time student: A part-time student, for reporting purposes, in Montana is one taking less than 12 undergraduate credit hours or 9 graduate credit hours.

First-time beginning freshmen: One who entered higher education for the first time in the current semester, term, quarter or session.

Full-time equivalent student: 15 student credit hours for undergraduates and 12 student credit hours for graduates are considered a full-time equivalent student.

Out-of-state student: For purposes of this report, the home address of the student determines his residence category.

Prior to Fall 1977 enrollments were reported as of the end of the 5th week of classes; beginning Fall 1977 enrollments are reported as of the end of the 3rd week of classes.
